

CCS 1000 D Transport Case, 6 Dev. & CU

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Can hold one Control Unit, six Discussion Devices and accessories
- ▶ Attractive, yet sturdy construction
- ▶ Interior specially molded to securely hold system units
- ▶ Easy to transport and store due to wheels and handles
- ▶ Two separate locks for optimum security

The CCSD-TC Transport Case is used where the CCS 1000 D Control Unit and Discussion Devices (CCSD-DS) will not be used in one fixed location and, therefore, have to be easily transportable. This is often the case in town halls, hotels, business centers, local government offices or smaller halls in major conference venues.

Functions

Capacity

The Transport Case can accommodate one Control Unit (CU) and up to six Discussion Devices (CCSD-DS) with standard (short) microphones. Storage space for the CU power supply adapter and other accessories is also provided.

Specially shaped interior

The Transport Case interior has shaped foam packing to accommodate the CU (incl. power supply adapter) and Discussion Devices (CCSD-DS). This gives ample protection and makes packing and unpacking easier.

Easy to transport and store

The Transport Case attractive but also extremely durable and practical. It has a handle on the top and side, and there are two wheels on the underside for

easy transport. The Transport Case can be locked for optimum security during transport and storage; keys are included.
