

# Programme 1 & 1LT

This attractively styled enclosure in heavily damped mineral loaded polypropylene contains a high power 100mm full range drive unit with copper clad magnet poles equalised for optimum performance in background music applications. The LT version contains a 100 volt line transformer with taps for 0.6, 1.25, 2.5, 5.0 and 10 watts accessed through an external connecting block at the rear of the cabinet. For ease of installation, each Programme 1 is supplied complete with a unique heavy duty universal fixing bracket which is constructed in powder coated steel and allows for adjustment on all three planes.
