COMPACT

Superior Sound QUALITY

Built-in digital amp module + DSP module, designed with state-of-the-art TOA technology.

SAFE, reliable system

- Loudspeakers are less vulnerable to damage, thanks to the equipped high-pass filter.

High-pass filter

EASY Operation

Simply designed, compactly installed. Standardized remote controller also offers easy operation.

Remote controller

- Built-in Speaker EQ optimized for TOA BS-1030 reduces acoustic feedback and ensures more intelligible voice sound.

Frequency Response

Optimal microphone sensitivity

Like the left figure, since there is some distance between the microphones and the imam, the sensitivity of these microphones are higher.

Built-in effector realizes celestial sound even in small mosques.

The 3-band EQ are effective for all mic inputs.

Connection

3-band EQ for all microphone inputs
Easy to reduce acoustic feedback

Digital effector for the microphone input 1-4/1-6
Realize enough reverberation like large mosques

The digital effect can be also applied to Azan.

High value of Japanese technology in both Hardware and Software

Quality control on the Factory Floor

TOA uses its very own factories both within Japan and overseas. Numerous engineers from Japan are sent to our overseas production plants to ensure that the state-of-the-art equipment adheres to the same stringent quality control system used in our Japanese production facilities. Furthermore, twice a year members from our Quality Control Division visit overseas production facilities to carry out inspections and make sure that quality standards are being maintained.

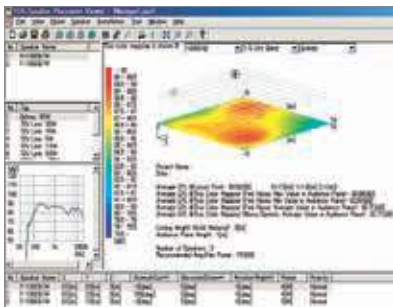

Compliance with Laws and Regulations

TOA is constantly carrying out tests to ensure that products comply with various regulations and standards around the world: safety regulations including UL, CE, CCC, RoHS, WEEE, EN 54, SASO, and REACH; the standards for each country; and ISO 9001. We do this so that consumers have complete peace of mind when using our quality products.

State-of-the-Art Equipment

In order to satisfy the legal requirements and conditions of each country, products must pass a large number of stringent tests. By installing various kinds of testing facilities, such as anechoic/echoic chambers and EMC test chambers, and by carrying out in-house testing, TOA has been able to improve its development efficiency.

TOA Speaker Placement Viewer: Software for Acoustic Simulation

At TOA, we are constantly trying to improve our services and share information with our customers. TOA Speaker Placement Viewer provides an easy way to calculate how many speakers are needed in a room. The software allows virtual placement of TOA Line Array, as well as all TOA Public Address and ProSound speakers.
