

## *LF12BP*

Compact bass  
Loudspeaker

The LF12BP is a compact bass loudspeaker designed to provide low frequency enhancement for many types of fixed audio system, making it ideal for AV systems within corporate, educational, hospitality venues and houses of worship.

It is solidly constructed from 18mm birch plywood, employing a 12" bass driver featuring a 75mm CCAW voice coil with UK manufactured optimised pulp cone, and using front and rear tuned chambers its performance has been optimised to provide efficient bass output in a compact format.

### Features

- Compact unobtrusive dual chamber bandpass design
- Ideal sub support for fixed background & foreground music systems
- 18mm Baltic Birch ply construction
- 97dB 2.83v/1m sensitivity
- Textured finish in black or white
- Made in the United Kingdom
